COMPANY BIO

Hadaway Consulting and Engineering provides cutting-edge engineering solutions for the oil and gas industry, specializing in well design, drilling optimization, completions efficiency, and production systems. At **Hadaway**, we prioritize safety, efficiency, and cost-effectiveness while integrating sustainable practices and advanced technology to improve performance and minimize environmental impact.

COMPANY DATA

CAGE Code:
9RLV8
 UEI:
LELNWEC4AMJ9
 Accepts Credit Cards
 Nationwide Service Area
 Disaster Response Registry

CORE COMPETENCIES

- **Engineering & Wellsite Services** – Well design, drilling optimization, completions, and production enhancement.
- **Regulatory & Compliance** – Regulatory filings, expert witness testimony, and industry compliance support.
- **Drilling & Stimulation** – Directional, horizontal, and conventional drilling, as well as stimulation and fracturing.
- **Facilities & Infrastructure** – Design and construction of wellsites, gathering systems, and production facilities.
- **Well Abandonment & Environmental Response** – Plugging, decommissioning, blowout intervention, and remediation.

DIFFERENTIATORS

- Over 150 years of combined experience in oil & gas engineering and operations.
- Active management of 3–4 drilling rigs simultaneously, including completions and workovers.
- Utilizes proven contract wellsite consultants with extensive field experience.
- Engineering team is highly skilled in all phases of a well’s lifecycle, allowing proactive planning to mitigate operational challenges.
